SUMMARY

Frontend Developer passionate about building responsive, user-centric web applications using React, JavaScript, and modern UI practices. Experienced in translating designs into clean, accessible interfaces with a strong focus on performance, usability, and scalability. Committed to writing maintainable code and delivering seamless user experiences from concept to production.

WORK EXPERIENCE

Frontend Developer Intern

April 2025 - Present

Gargi HoReCa (Bhilai)

- Built responsive UI components using React, JavaScript, HTML, and CSS.
- Converted Figma designs into functional layouts.
- Fixed UI bugs and improved front-end performance by 15–20%.
- Improved accessibility and UI consistency by following standard design guidelines.

PROJECTS

Brand4Brand

- Currently developing a Brand4Brand website using React / Next.js, focusing on clean UI, reusable components, and responsive layouts.
- Integrating Firebase for authentication and database to handle user data and real-time updates.
- Continuously improving performance, usability, and overall frontend experience as the project progresses.

Crptocurrency App

- Developed a cryptocurrency tracking web app using React, integrating real-time market data and latest crypto news via RapidAPI.
- Implemented dynamic routing to view detailed insights for each coin, including price trends, market stats, and comparisons.
- Visualized coin performance with interactive Chart.js graphs, delivering a smooth and informative user experience.

EDUCATION

Aug 2025 - Aug 2028

Bachelor of Computer Education

Manipal University Jaipur
